

LS Electric America VFD Training

Certified Startup Training

Purpose:

The purpose of the Certified Startup Training (CST) for LS VFDs is to grant an additional 2 years of warranty on LS VFDs installed and commissioned by a person who has been given the training and passed the exam. This training is meant for OEMs, system integrators, distributors, etc., who will be installing LS VFDs in their panels or their equipment. The training can be taken by people who will not be installing the VFDs as well, to gain better insight into various drive operations.

Overview:

The training covers a basic understanding of VFDs, the current LSEA offering, installation and wiring guidelines, using the LCD and LED keypads, basic setup, programming, and other information. These topics allow the installer to be confident in the installation process. The In-house training is offered at our Americas headquarters in Lincolnshire, IL. The schedule can be found on www.lselectricamerica.com and is conducted on a quarterly basis. Classes are limited to no more than 12 people per session. On-site training is offered on a case-by-case basis and based on availability. Refer to the table below for further information.

Certification:

To become certified the student must pass the class test. Once a student is certified, the certification will expire in 3 years in which they will be required to re-certify via recertification training. This can be achieved by attending another class or retaking the test with a passing score.

Documentation:

After the training and once the test is passed, startup documentation and procedures will be provided by LS Electric America. Completed Startup Forms are required to be submitted to LS Electric America to track all installs and warrantable VFDs installed. The standard factory warranty will apply if a startup form has not been completed for that particular VFD.

Cost:

The In-house CST training class has a \$300 fee. A PO needs to be submitted ahead of time to reserve a spot. An invoice can be sent over per request. The student may cancel attendance at least 7 days prior to the first day of the scheduled class. All travel arrangements and travel costs will be provided by the student. Breakfast/snacks and lunch will be provided by LS Electric America.

Remote training has a \$2500 fee + travel expenses (air fare, hotel, etc.). For any remote training requests, refer to the table below and fill out the following form: <https://www.lselectricamerica.com/training/>

	In-house Training	Remote Training
Fee	\$300	\$2500 + travel expenses
