

LS ELECTRIC America

Automation Product Warranty Policy

Warranty Period

LS ELECTRIC America warrants their products and their accessories to be free from defects in material and workmanship, if properly installed, operated, and maintained under normal conditions of service and used per published specifications, for a period of

- (i) 24 months from the date of shipment for low voltage (LV) variable frequency drives.
 - a. The warranty period is extended to 48 months for variable frequency drives when installed using a LS ELECTRIC America Certified Start-Up Partner.
- (ii) 12 months from the date of shipment (24 months from the date of manufacture) for HMI and PLC products.
- (iii) 24 months from the date of shipment for servo motors and drives.

All product types are defined in Appendix A.

Limitations of Warranty

Only new products sold by LS ELECTRIC America authorized re-sellers are covered by this warranty.

In addition, the following circumstances effectively void the warranty:

- Improper installation, connection, or wiring.
- Failure to apply the product in accordance with the conditions specified in the product's manual.
- Product exposed to abnormal contamination or environment outside of the product's published specifications.
- The product has been subjected to negligent or accidental misuse, unauthorized repair, or unauthorized electrical alteration.
- Failure to properly maintain the product in accordance with the product's manual.
- Shipping or handling damage after initial shipment from LS ELECTRIC America warehouse.
- Improper Storage.
- Natural disasters.

Standard Warranty Handling Procedure

The procedure for warranty claim handling should begin only after a reasonable attempt has been made to remedy the problem remotely via the LS ELECTRIC America Hotline (800-891-2941) or on-site by an LS ELECTRIC America representative. Authorization of the claim is dependent on the above-mentioned warranty periods and necessary provided information such as serial #, product model, and PO.

For low voltage (LV) variable frequency drives rated 100HP (75kW) and smaller:

LS ELECTRIC America will promptly provide a Technical Return Material Authorization (TRMA) form either directly to the customer or via an authorized agent. The form shall be completed by the original purchaser/distributor. Failure to do so may result in delays or cancellation of the request. Once received and approved by LS ELECTRIC America, a reference number is assigned and shared. The failed product is to be sent back to LS ELECTRIC America for analysis. All returned products should be returned via ground shipping or scheduled freight pickup. Return instructions will be provided by LS ELECTRIC America for the return unit(s). Failure to follow the LS ELECTRIC America authorized return method will result in a chargeback. LS ELECTRIC America reserves the right to repair products in the field or in house in lieu of replacement or credit as long as the product is in good condition. Products returned in an unrepairable state and covered under warranty may be replaced with a new or refurbished product.

Per the customer's request, LS ELECTRIC America may ship a new replacement or refurbished VFD within one business day of receiving and assigning a TRMA number as long as current stock levels allow. All returned products should be

returned via ground shipping or scheduled pickup. If requested, a report will be generated stating the cause of the failure and whether it is warrantable or not.

For low voltage (LV) variable frequency drives rated greater than 100HP (75kW):

LS ELECTRIC America will promptly provide a Technical Return Material Authorization (TRMA) form either directly to the customer or via an authorized agent. The form shall be completed by the original purchaser/distributor. Failure to do so may result in delays or cancellation of the request. Once received and approved by LS ELECTRIC America, a reference number is assigned and shared. LS ELECTRIC America reserves the right to repair the product on-site, if it can be done so in a timely manner. If an on-site repair is not possible, the unit will be sent to an authorized LS ELECTRIC America repair center for analysis and repair.

The product will be analyzed within 7–10 days of receiving the unit. The result of the analysis (warrantable or non-warrantable) will be communicated to the customer via e-mail or phone. If requested, a report will be generated stating further details of the cause of the failure and whether it is warrantable or not. If it is deemed not under warranty, the customer will be charged for the replacement unit sent out including the shipping freight cost and returning freight cost of the original failed product.

If the VFD is deemed not under warranty, and a replacement or refurbished VFD was sent out, the customer will be invoiced the amount for the replacement VFD sent; net price when a new VFD is sent or a reduced price for refurbished VFDs. Furthermore, if it is deemed not under warranty, and the customer does not request an immediate replacement, the customer will have the option to pay for the repair costs and receive the VFD back.

If the VFD is found to be under warranty, the VFD will be repaired at LS ELECTRIC America's expense and sent back to the address on the TRMA form if an immediate replacement was not sent.

The customer has an option of choosing a credit request. Credit can only be issued if the original purchase was within 90 days of the TRMA claim.

General Terms

LS ELECTRIC America reserves the right to provide a refurbished product as a replacement, and if a refurbished product is unavailable, then a new one shall be provided. If a refurbished product is provided the remaining warranty from the original product transfers over. The general terms under warrantable products only include parts. LS ELECTRIC America reserves the right to send repair parts to provide the timeliest solution.

The customer has an option of choosing a credit request for failed and/or defective products. Credit can only be issued when and if analysis report results warrantable and if the original purchase was within 90 days of claims.

The customer shall return the defective product to the address indicated by the LS ELECTRIC America employee or authorized agent handling the case, with consideration for adequate packaging. The defective product shall be freight prepaid by LS ELECTRIC America. When utilizing LS ELECTRIC America's shipping account, ground shipping must be used unless otherwise authorized by LS ELECTRIC America. If the defective product is not received by LS ELECTRIC America within 30 calendar days of the replacement product's ship date, then the customer will be billed for the replacement product.

LS ELECTRIC America

Automation Product Warranty Policy

If LS ELECTRIC America determines the product's warranty has been voided and/or the defect was not due to defective materials or faulty workmanship, then a quotation containing a repair option(s) will be issued to the customer. If the customer elects not to have the product repaired, then the product shall be returned to the customer, if so requested, at their expense. The customer will be charged for the replacement product.

If the returned product is found to be fully operational and no problem can be found, the LS ELECTRIC America Service Center will issue a report. The customer will be informed. The product shall be returned to the customer, if requested, at their expense. The customer will be charged for the replacement product if one was sent.

Any modification to a product or unauthorized opening/disassembly of a product will void the factory warranty.

Shipping Costs:

LS ELECTRIC America will pay for the shipping of returned materials due to damage and product failures. Shipping for products to be returned due to incorrect usage or ordered in error will need to be paid by the requestor.

Return Delivery Time:

All products to be returned must be returned to the location given within 30 days of the TRMA form being completed. If the part is not received within the 30-day period the TRMA is void, any replacement product(s) shipped from LS ELECTRIC America for the TRMA will then be billed to the business of the requestor.

Thank you for choosing and using LS ELECTRIC America.

Appendix A: Specification of Products

1. Variable Frequency Drives (VFD)
 - iS7
 - H100/H100+, SP100
 - S100
 - M100
 - G100
 - All VFD accessories
2. HMI and PLCs
 - eXP2/eXP3
 - iXP2/iXP3
 - XGB
